

UI / UX Designer

IntelliFarms designs and manufactures embedded IoT products and software that goes into agricultural applications from grain storage and management - to weather data and automation in the fields. Our customers range from Farmers to Processors you'd recognize on the back of a box in the grocery store. We are well past our start up phase and don't rely on outside capital.

We are on the cutting edge of AgTech - and need your help to stay that way.

A UI/UX Designer will work on the Applications team to build and improve the software that our customers use. The Applications team within IntelliFarms creates the applications that collect and translate data from our Agricultural IoT devices to information that our customers can use and make sense of.

You will be a critical component of our product development, ensuring that our products deliver a great customer experience, via novel design and offering a great user experience.

Responsibilities:

- UI / UX design for our responsive web and mobile interfaces for the products our customers interact with, as well as internal tools.
- Creation of wireframes / mockups for multiple device layouts
- Working directly with application developers, designing interfaces of new features, improving the look of existing interfaces
- Participate in the product design process
- Creation of standard UI components and style guides to ensure a unified look and feel throughout our products
- Work with existing brand guidelines, and help collaborate with the Marketing team to improve when needed

What we look for:

- Quick learner - You love to learn and are able to quickly pick up tools and put them to use
- Excellent at communicating your ideas and gathering requirements
- Amazing interface design skills - Able to translate requirements to interfaces that are a joy for customers to use

- A heavy focus on improving the Customer Experience
- Detail focused - while understanding the importance of getting a product shipped
- A relevant college education and/or equivalent experience
- BONUS: An interest in learning tools / languages related to our stack (React.js)
- BONUS: A love for BBQ or Sushi

At IntelliFarms you will:

- Solve unique problems that don't exist in other domains
- Be part of a team that cares about who you are and your growth as a designer
- Help design and build software that provides profit to farmers and food to your family
- Receive great benefits (401k match, catered lunches, sushi dinners, beer fridge, dog friendly workplace, gym equipped with Pelotons, and more...)

If you think we might be a match for you, please respond with your resume attached.
