

Electronic Technician

IntelliFarms designs and manufactures sensor products that go into agricultural applications from grain storage and management - to weather data and automation in the fields. Our customers range from Farmers to Processors you'd recognize on the back of a box in the grocery store. We are well past our start-up phase and don't rely on outside capital. We are on the cutting edge of AgTech - and need your help to stay that way.

We are looking for an experienced Electronics Technician to be part of our Product Development team.

Duties:

- Build and test prototype circuit assemblies
- Troubleshoot product returns
- Build in-house electronic test equipment

You Are:

- Fluent in electronics—Analog, Digital, and Power Supplies
- Resourceful—Someone who can find answers
- Organized—We have a lot of circuit assemblies, products, and components. We have a lot of activity and people in our lab.
- A Team Player—You will need to support several engineers and work with other Electronic Technicians.

You Will:

- Have a great deal of independence to balance a heavy load.
- Solve some very challenging technical problems.
- Work with some very happy, yet goal-focused people.
- Receive great benefits (401k match, beer fridge, dog friendly workplace, and more...)

You Have:

- A degree such as an Associates in Electronics or a BSEET.
- At least 3 years experience as an Electronic Technician.
- A desire to constantly learn and a drive to perform well.
- A respect for our farmers who are feeding the world and a desire to be a part of our mission to help them succeed.

If you think we might be a match for you, please respond with your resume attached.
